OSHA Outreach Training - General Industry

A overview of general occupational safety topics

The OSHA Outreach Training Program for General Industry provides basic training for workers and employers on the recognition, avoidance, abatement, and prevention of common job-related safety and health hazards while giving a general overview of OSHA Standards. The program also provides information regarding workers' rights, employer responsibilities, and how to file a complaint. Through this training, OSHA helps to ensure that workers are more knowledgeable about workplace hazards and their rights, and contribute to our nation's productivity.

While course lesson plans are provided by the OSHA Office of Training and Education, it is important to note that this is a voluntary program and does not fulfill an employer's requirement to provide training per any specific OSHA standards. Although some states, municipalities or others may require outreach training as a condition of employment, it is not an OSHA requirement.

An OSHA authorized trainer will be presenting this training. Students receive an OSHA course completion card.

10-Hour course

Covers common job-related safety and health hazard topics:

- Intro to OSHA
- Walking and Working Surfaces
- Bloodborne Pathogens
- Industrial Hygiene
- Electrical Awareness
- Exit Routes, Fire Protection
