Overview

Schmersal’s SLC445 Series are Type 4 Safety Light Curtains that incorporate a full range of common and unique application functions which are completely configurable without the need of a special tool or software.

The SLC/ SLG 445 series offers numerous functions as standard features: fixed blanking, floating blanking, fixed blanking with movable edge region, double reset, controller control (EDM), automatic mode, re-start mode, error codes and flashing signals to report specific faults and problems. Also, the 7-segment display which was so helpful in set up, now displays range, range diagnostic, internal status, and problem codes.

Installation of the emitter and receiver units is made easier with the integrated alignment aid. This function tests the first and last beams for alignment and displays the results on the 7-segment display. Once both are situated properly, the display can be changed over to show signal strength, to allow for fine tuning the alignment.

Operating status is clear and can be seen from a distance. The end cap of the receiver unit is molded from a semi-transparent plastic that is proven to be less susceptible to mechanical damage and misalignment.

The SLC/ SLG 445 series features a one-piece extruded reinforced housing in a compact 28 mm x 33 mm rectangular profile. This housing profile has proven to be less susceptible to mechanical damage and misalignment from torsion or bending.

Safety light curtains SLC445 are used for the protection of hazardous areas, and are available with resolutions of 14 or 30 mm and protection field heights between 170 and 1770 mm. The series is suited for use in safety circuits up to PLe (EN 13849) or SIL3 (IEC 61508).

Muting Function

If goods or objects must be transported in or out of the hazardous area without stopping the machine, the safety light curtain must be automatically and temporarily suspended.

To this end, two or four muting sensors are used to detect whether a person is approaching the hazardous area or a transport system enters or leaves the hazardous area.

Applications

- Power-driven machines
- Power presses for the metal and plastics industry
- Folding or brake presses
- Filter presses
- Punching machines
- Robot cells
- Welding booths
- Printing machines
- Injection molding
- Palletizers
- Packaging equipment

Mounting hardware included

Accessories

- Connector cables:
  - KA-0804 5 m cable for emitter
  - KA-0805 10 m cable for emitter
  - KA-0980 5 m cable for receiver
  - KA-0981 10 m cable for receiver
- Muting accessories:
  - FR-20-PSM4 Muting sensor
  - RD 83 Reflector, D = 83 mm
  - MCU-02 Muting connection unit
  - MK6 Muting Lamp
  - KA-0904 5 m cable for receiver
  - KA-0905 10 m cable for receiver
  - KA-0846 2 m cable-muting sensor
  - KA-0847 5 m cable-muting sensor
  - KA-0845 Connector cable from Emitter unit to MCU-02

Compatible Safety Controllers

- SRB-E-391LC
- SRB-E-322ST
- SRB-E-201ST
- SRB-E-402ST
- SRB-E-301ST
- SRB-E-301MC
- SRB-E-212ST
- SRB-E-204ST
