

Implementation of the European Machinery Directive

Machine manufacturers have certain legal requirements to meet when providing machines for the European market. This course provides background knowledge in order to be able to pass through a CE conformity assessment procedure as a manufacturer, in accordance with the Machinery Directive (MRL 2006/42/EC).

This comprehensive training is 35 hours over the course of five days

Course outline:

- Why the CE Mark
- International and European standards related to CE
- Technical Construction File
- Essential Health and Safety Requirements
- Risk Assessment Process for CE
- Action Item Lists
- Relevant Documentation
- Practical exercises
