

MACHINE SAFETY IN ONTARIO

Hazard analysis and implementing machine safety can be complicated. We're here to help

Let's face it, keeping up with safety standards and Occupational Health and Safety regulations can be a confusing and challenging task. Let us help you understand machine guard safety.

We're inviting you to attend our informative seminar on such topics as PSR, risk assessment, and CSA standards on guarding.

During this seminar we will review:

- ❑ PSR Guidelines - requirements for Ontario
- ❑ Initial steps before purchasing a machine
- ❑ Steps for existing machinery
- ❑ Updates to current standards
- ❑ ISO 14119 - the standard for interlock design

Instructors

Franco Tomei

- Professional Engineer licensed in Ontario
- 18 years conducting Pre-Start Health and Safety Reviews
- Taught machine safety classes with the IAPA and WSPS as part of the Ministry of Labour and helped develop the first version of Z432

Steven Lange

- 10 years performing safety integrations
- 23 years in the machine safety industry
- Functional Safety Engineer 10 years 2015-2025
- Teaches Risk Assessment and general machine guarding principles to companies via Schmersal tec.nicum global team.
